

BiPAC 7404V series

**VoIP/(802.11g) ADSL2+
(VPN) Firewall Router**

Quick Start Guide

For more detailed instructions on configuring and using the Billion VoIP/(802.11g) ADSL2+ (VPN) Firewall Router, please refer to the on-line manual.

Package Contents

- VoIP/(802.11g) ADSL2+ (VPN) Firewall Router
- CD-ROM containing the online manual
- RJ-11 ADSL/telephone Cable
- Ethernet (CAT-5 LAN) Cable
- Console Kit (RJ45-RS232)
- A detachable antenna
- AC-DC power adapter (12VDC, 1.2A)
- This Quick Start Guide

Warning

- ✓ Do not use this router in high humidity or high temperatures.
- ✓ Do not use the same power source for this router as other equipment.
- ✓ Do not open or repair the case yourself. If this router is too hot, turn off the power immediately and have it repaired at a qualified service center.
- ✓ Avoid using this product and all accessories outdoors.

Attention

- ✓ Place this router on a stable surface.
- ✓ Only use the power adapter that comes with the package. Using a different voltage rating power adaptor may damage this router.

The Front LEDs

LED		Meaning
1	PWR	Lit when power is ON.
2	SYS	Lit when the system is ready.
3 – 6	LAN Port 1X — 4X (RJ-45 connector)	Lit when connected to an Ethernet device. Green for 100Mbps; Orange for 10Mbps. Blinking when data is Transmitted / Received.
7	WLAN (Wireless Router only)	Lit green when the wireless connection is established. Flashes when sending/receiving data.
8 – 9	Phone 1X — 2X (RJ-11 connector)	Lit green when the phone is off-hook.
10	LINE (Router with LINE port only)	Lit when the inbound and outbound calls transmitted through PSTN.
12	VoIP Port 1X — 2X (RJ-11 connector)	Lit when the SIP Registration is OK. Green for Phone 1; Orange for Phone 2.
13	ADSL/PPP	Lit Green when successfully connected to an ADSL DSLAM (“linesync”). Lit Orange when there is a PPPoA / PPPoE connection.

The Rear Ports

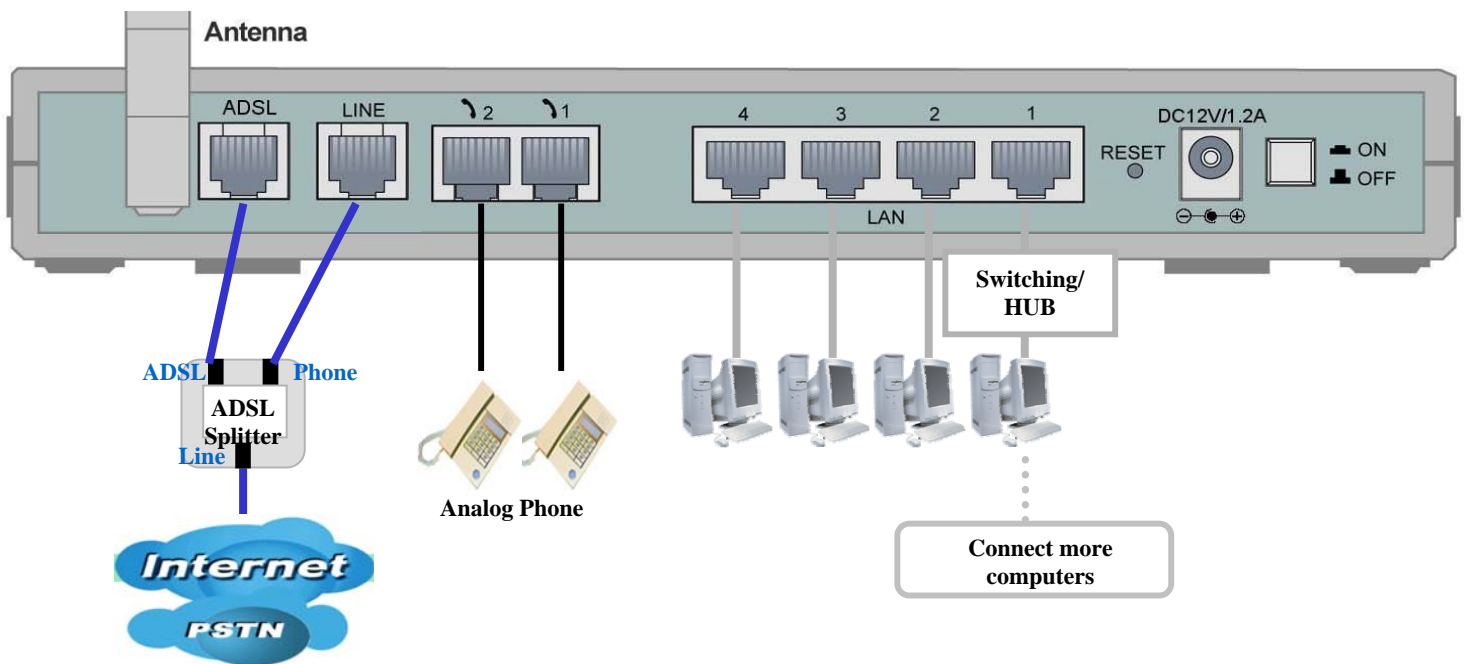

NOTE:

The LAN 4 can be connected to the computer and console cable. You need a special console kit in this package to connect the LAN cable of Port 4 when connecting to a PC's RS-232 port (9-pin serial port).

Port		Meaning
1	Power Switch	Power ON/OFF switch
2	PWR	Connect the supplied power adapter to this jack.
3	RESET	After the device is powered on, press it to reset the device or restore to factory default settings. 1-3 seconds: reset the device 6 seconds above, and power off, power on the device: restore to factory default settings (this is used when you can not login to the router, e.g. forgot the password)
4	LAN 1X — 4X (RJ-45 connector)	Connect a UTP Ethernet cable (Cat-5 or Cat-5e) to one of the four LAN ports when connecting to a PC or an office/home network of 10Mbps or 100Mbps.
5	Phone 1X — 2X (RJ-11 connector)	Connect RJ-11 cable to this port when connecting to an analog phone set.
6	LINE (Router with LINE port only)	Connect RJ-11 cable to this port when connecting to the telephone wall jack.
7	ADSL	Connect the supplied RJ-11 ("telephone") cable to this port when connecting to the ADSL/telephone network.
8	Antenna (Wireless Router only)	Connect the detachable antenna to this port.

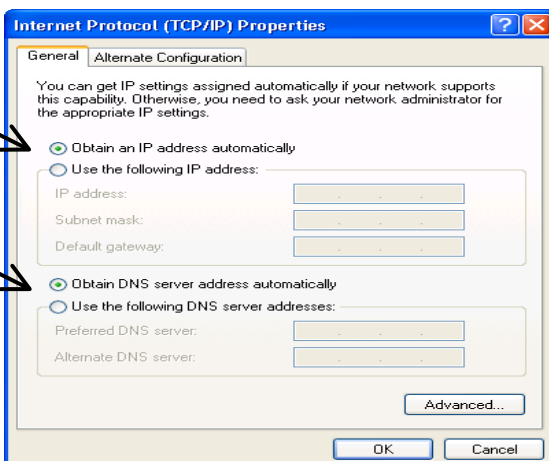

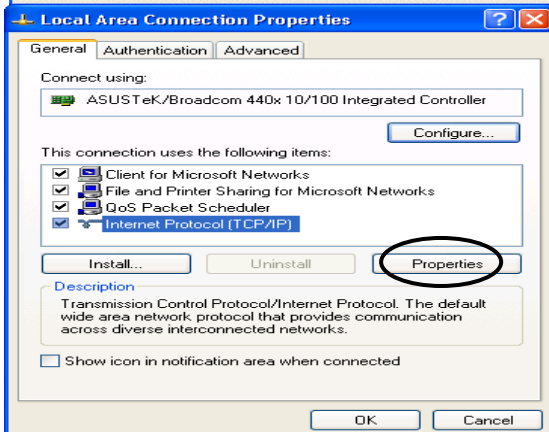

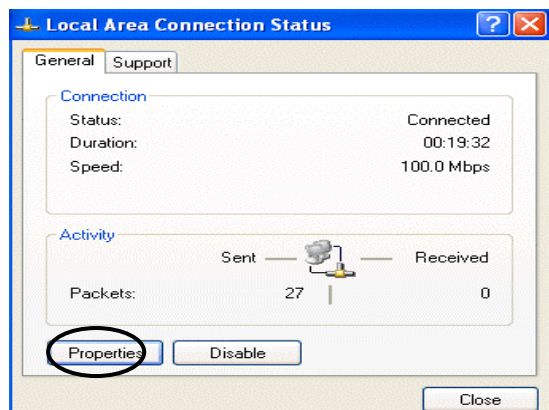

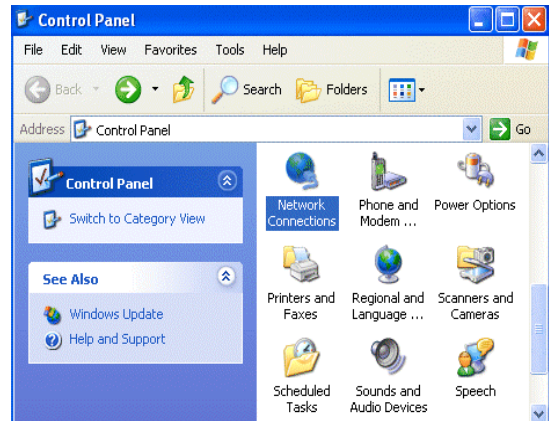

Connecting Your ADSL Router

1. Connect this router to a LAN (Local Area Network) and the ADSL/telephone (**ADSL**) network.
2. Power on the device.
3. Make sure the **PWR** and **SYS** LEDs are lit steadily and that the **LAN** LED is lit.
4. Connect an RJ11 cable to VoIP port when connecting to an analog phone set.
5. Connect RJ-11 cable to LINE Port when connecting to the telephone wall jack

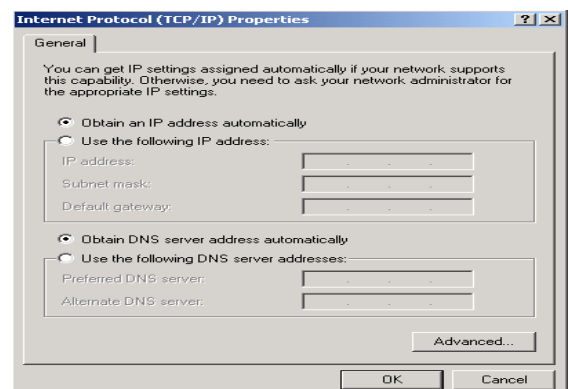

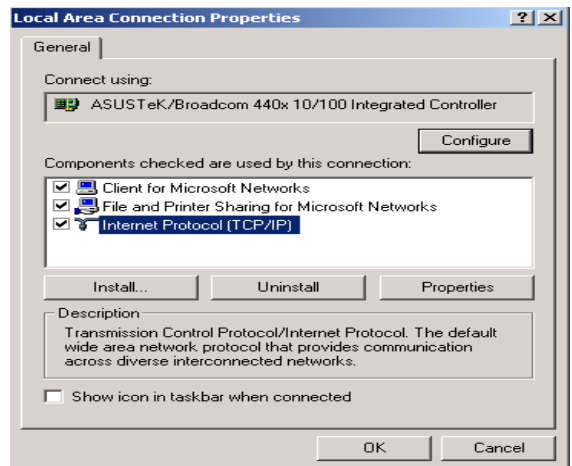

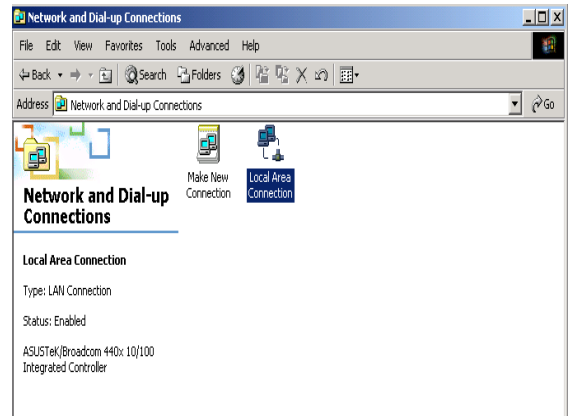

Configuring PC in Windows XP

1. Go to **Start / Control Panel (in Classic View)**. In the Control Panel, double-click on **Network Connections**
2. Double-click **Local Area Connection**.
3. In the **Local Area Connection Status** window, click **Properties**.
4. Select **Internet Protocol (TCP/IP)** and click **Properties**.
5. Select the **Obtain an IP address automatically** and the **Obtain DNS server address automatically** radio buttons.
6. Click **OK** to finish the configuration.

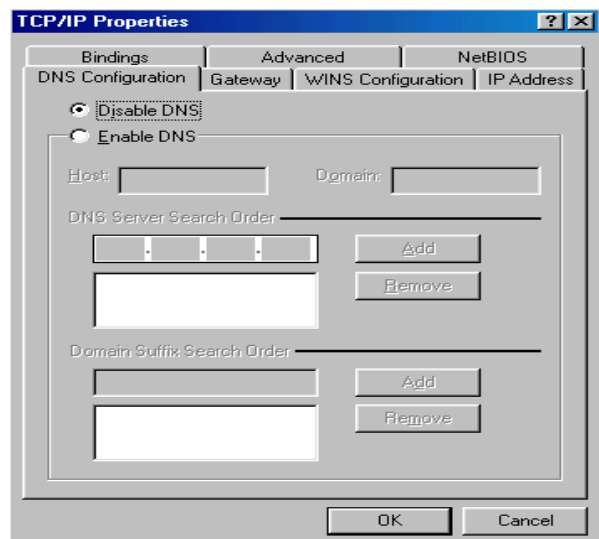

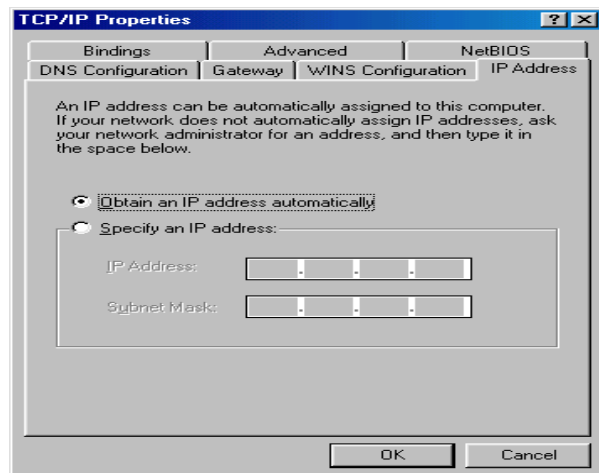

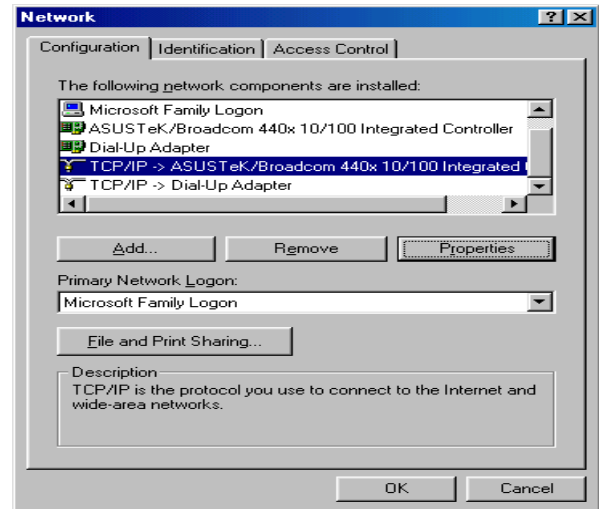

Configuring PC in Windows 2000

1. Go to **Start / Settings / Control Panel**. In the Control Panel, double-click on **Network and Dial-up Connections**.
2. Double-click **Local Area Connection**.
3. In the **Local Area Connection Status** window click **Properties**.
4. Select **Internet Protocol (TCP/IP)** and click **Properties**.
5. Select the **Obtain an IP address automatically** and the **Obtain DNS server address automatically** radio buttons.
6. Click **OK** to finish the configuration.

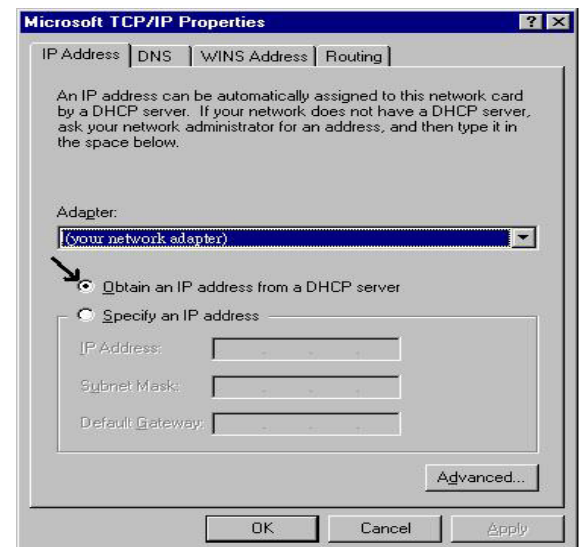

Configuring PC in Windows 98/Me

1. Go to **Start / Settings / Control Panel**. In the Control Panel, double-click on **Network** and choose the **Configuration** tab.
2. Select **TCP/IP -> NE2000 Compatible**, or the name of your Network Interface Card (NIC) in your PC.
3. Select the **Obtain an IP address automatically** radio button.
4. Then select the **DNS Configuration** tab.
5. Select the **Disable DNS** radio button and click **OK** to finish the configuration.

Configuring PC in Windows NT4.0

1. Go to **Start / Settings / Control Panel**. In the Control Panel, double-click on **Network** and choose the **Protocols** tab.
2. Select **TCP/IP Protocol** and click **Properties**.
3. Select the **Obtain an IP address from a DHCP server** radio button and click **OK**.

Configuring Your ADSL Router

To configure this device, you must have IE 5.0 / Netscape 4.5 or above installed

■ Verifying Your Local Network Connection with the Device

To see if this ADSL Router is visible on the local network, go to **Start / Run**. In the Run dialog box, type “**ping 192.168.1.254**” then press **OK**.

A command prompt window will pop out. If your ping is successful which means your local network is able to reach to the device, then the command prompt window will close up automatically.

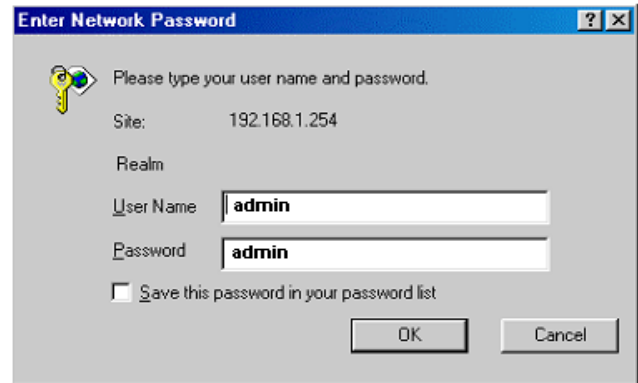

Connection fails, when you see “**Request timed out**” in the command prompt window. You may need to check your set up.

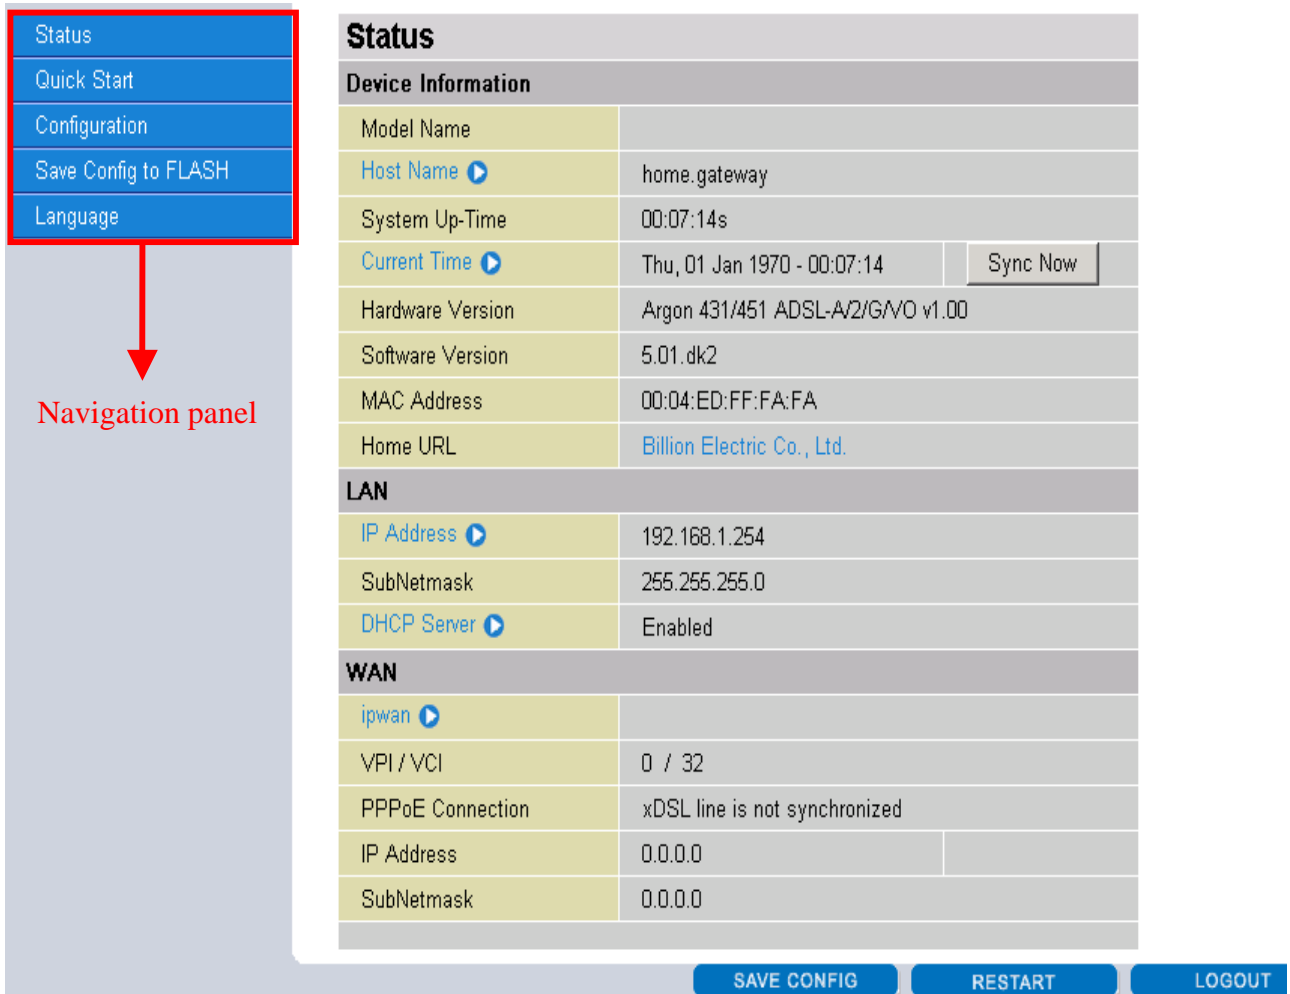

■ Connecting to the Router

1. Open the web browser and type <http://192.168.1.254> in the browser's address box. This number is the default IP address for this router. Press **Enter**.
2. A username and password window will appear. **The default username and password are admin and admin.** Press **OK** to proceed.

3. You will get a status report web page and main menu screen.

Status

Device Information

Model Name	
Host Name	home.gateway
System Up-Time	00:07:14s
Current Time	Thu, 01 Jan 1970 - 00:07:14 Sync Now
Hardware Version	Argon 431/451 ADSL-A/2/G/VO v1.00
Software Version	5.01.dk2
MAC Address	00:04:ED:FF:FA:FA
Home URL	Billion Electric Co., Ltd.

LAN

IP Address	192.168.1.254
SubNetmask	255.255.255.0
DHCP Server	Enabled

WAN

ipwan	
VPI/VCI	0 / 32
PPPoE Connection	xDSL line is not synchronized
IP Address	0.0.0.0
SubNetmask	0.0.0.0

Navigation panel: Status, Quick Start, Configuration, Save Config to FLASH, Language

Buttons: SAVE CONFIG, RESTART, LOGOUT

At the main menu screen, the left navigation panel where bookmarks are provided links you directly to the desired setup page, including:

- **Status** (ARP Table, Wireless Association (**Wireless Router only**), Routing Table, DHCP Table, PPTP Status, IPsec Status, L2TP Status (**Only the 7404VGO has VPN features**), Email Status, VoIP Status, Event Log, Error Log, NAT Sessions, Diagnostic and UPnP Portmap)
- **Quick Start**
- **Configuration** (LAN, WAN, System, Firewall, VPN (**Only the 7404VGO has VPN features**), VoIP, QoS, Virtual Server, Time Schedule and Advanced)
- **Save Config to FLASH**
- **Language** (provides user interface in English and French languages).

Please see the relevant sections of on-line manual for detailed instructions on how to configure your router.

Product Support and Contact Information

Most problems can be solved by referring to the **Troubleshooting** section in the User's Manual. If you cannot resolve the problem with the **Troubleshooting** chapter, please contact the dealer where you purchased this product.
